WOWZA

IP Video Solutions for Security and Surveillance

Real-Time Streaming for Rapid Decision-Making

At the intersection of physical security and IoT, video surveillance is essential for protecting our populations, communities, and world. Wowza delivers reliable and scalable IP video capabilities that can be integrated into any security product or service.

The number of devices connected to the internet will be more than **THREE TIMES THE GLOBAL POPULATION BY 2022,** a sizeable percentage of which will take the form of surveillance-based products that incorporate streaming technology.[1]

"We looked at several solutions in the streaming media space, but went with Wowza because of the portability, manageability, and broad array of protocols. Most importantly, the focus on low latency is mission-critical for our customers. With Wowza, the price is right, stability is very good, and documentation is fantastic."

—*Michael Helfrich, CEO and Founder, Blueforce Development*
